**2020 GRS-Bay Rift (Chimney) activities
and GRS 3-month oscillation**

2020 Jun 20 C. Go 17:39.0

<CH4>

↓ GRS-Bay Rift

Shinji Mizumoto, Kuniaki Horikawa
ALPO-Japan

One of the authors, Kuniaki Horikawa, at the RAS-Juno Europlanet Meeting 2018 (London), he pointed out the following under the title of "On the Periodic Rifting in GRS Bay". [Link-Ref. 1\)](#)

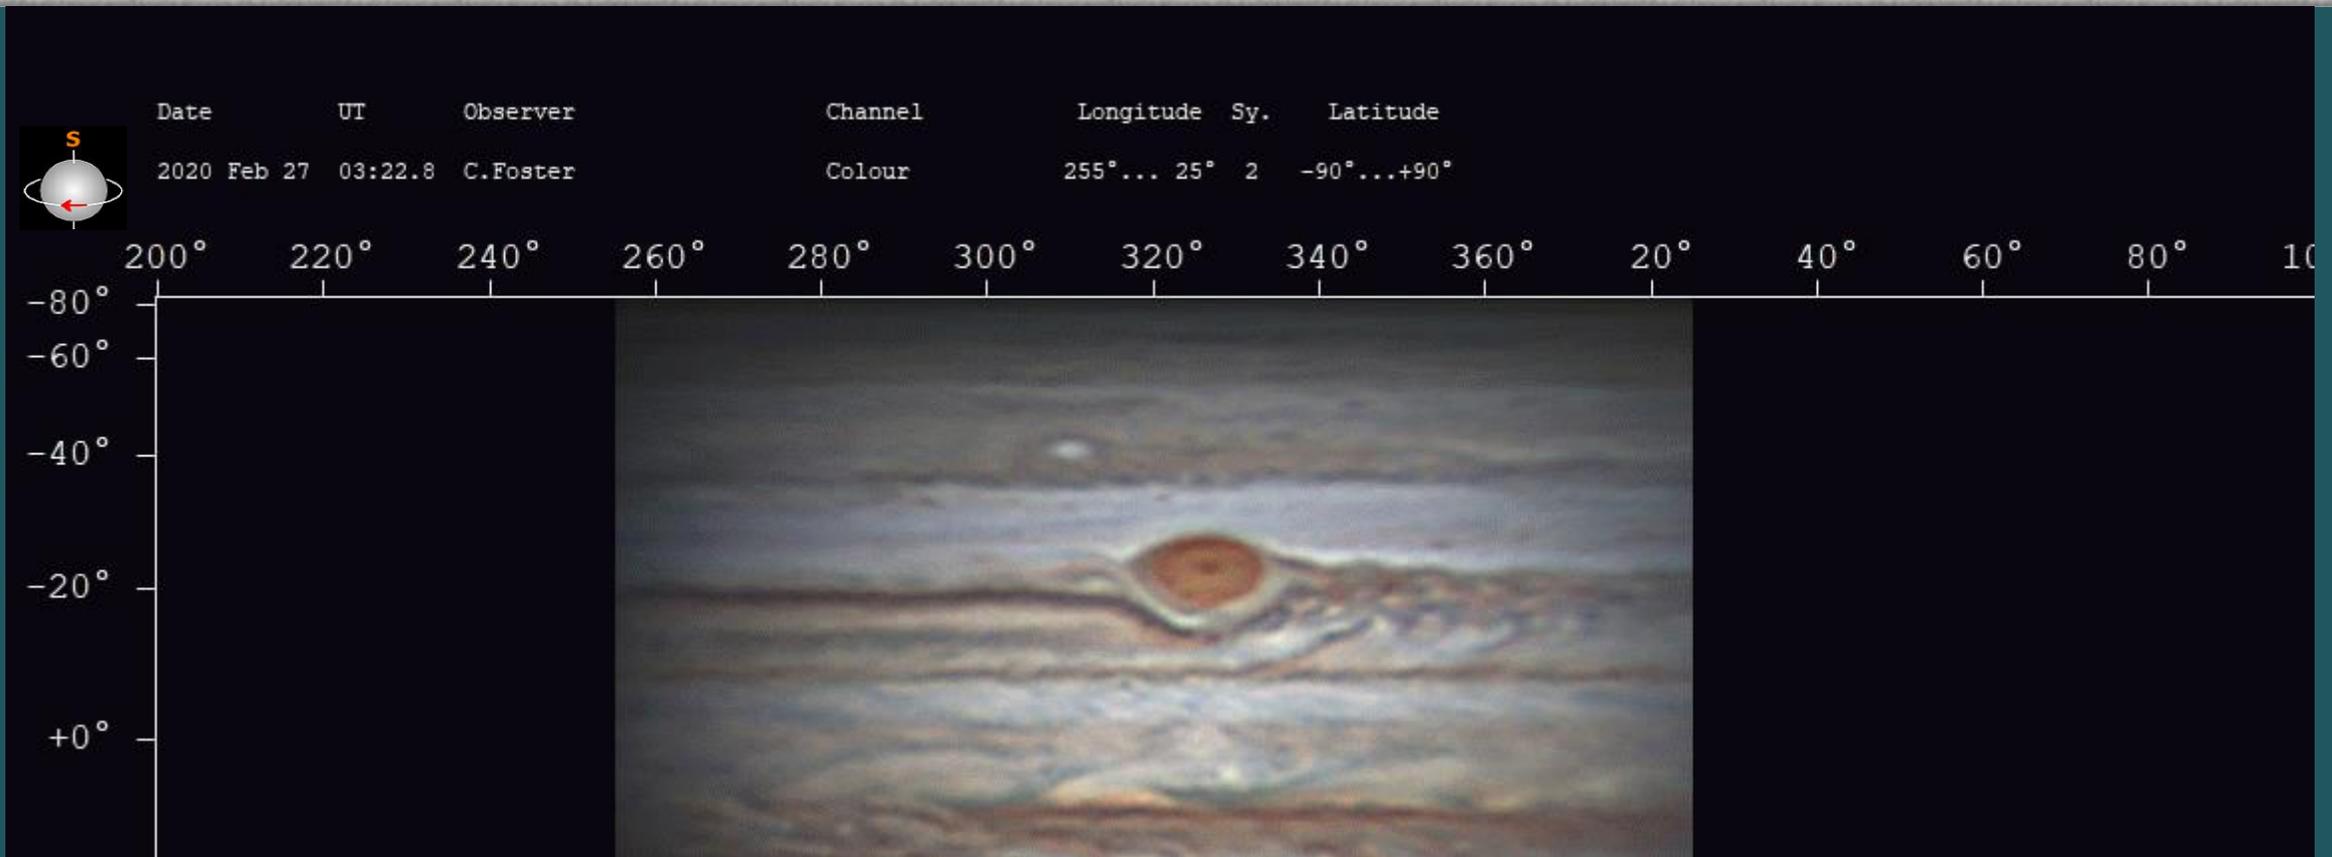

----In the 3-month oscillation of GRS----

- The GRS-Bay Rift (Chimney) opens when the GRS longitude changes from decreasing to increasing (entering the retrograde period).
- The GRS-Bay Rift (Chimney) closes when the GRS longitude changes from increasing to decreasing (entering the prograde period).

2020 GRS-Bay Rift opening and closing date.

No.	open		close
1)	2020 Mar 05	~	2020 Apr 18
2)	2020 Jun 07	~	2020 Jul 28
3)	2020 Aug 25	~	2020 Oct 20
4)	2020 Dec 05?	~	

- Maps and animation creation.
- Measured longitude of GRS-Bay Rift and GRS.
- ↓
- Verified the relationship between the opening and closing of GRS-Bay Rift and the 3-month oscillation of GRS.

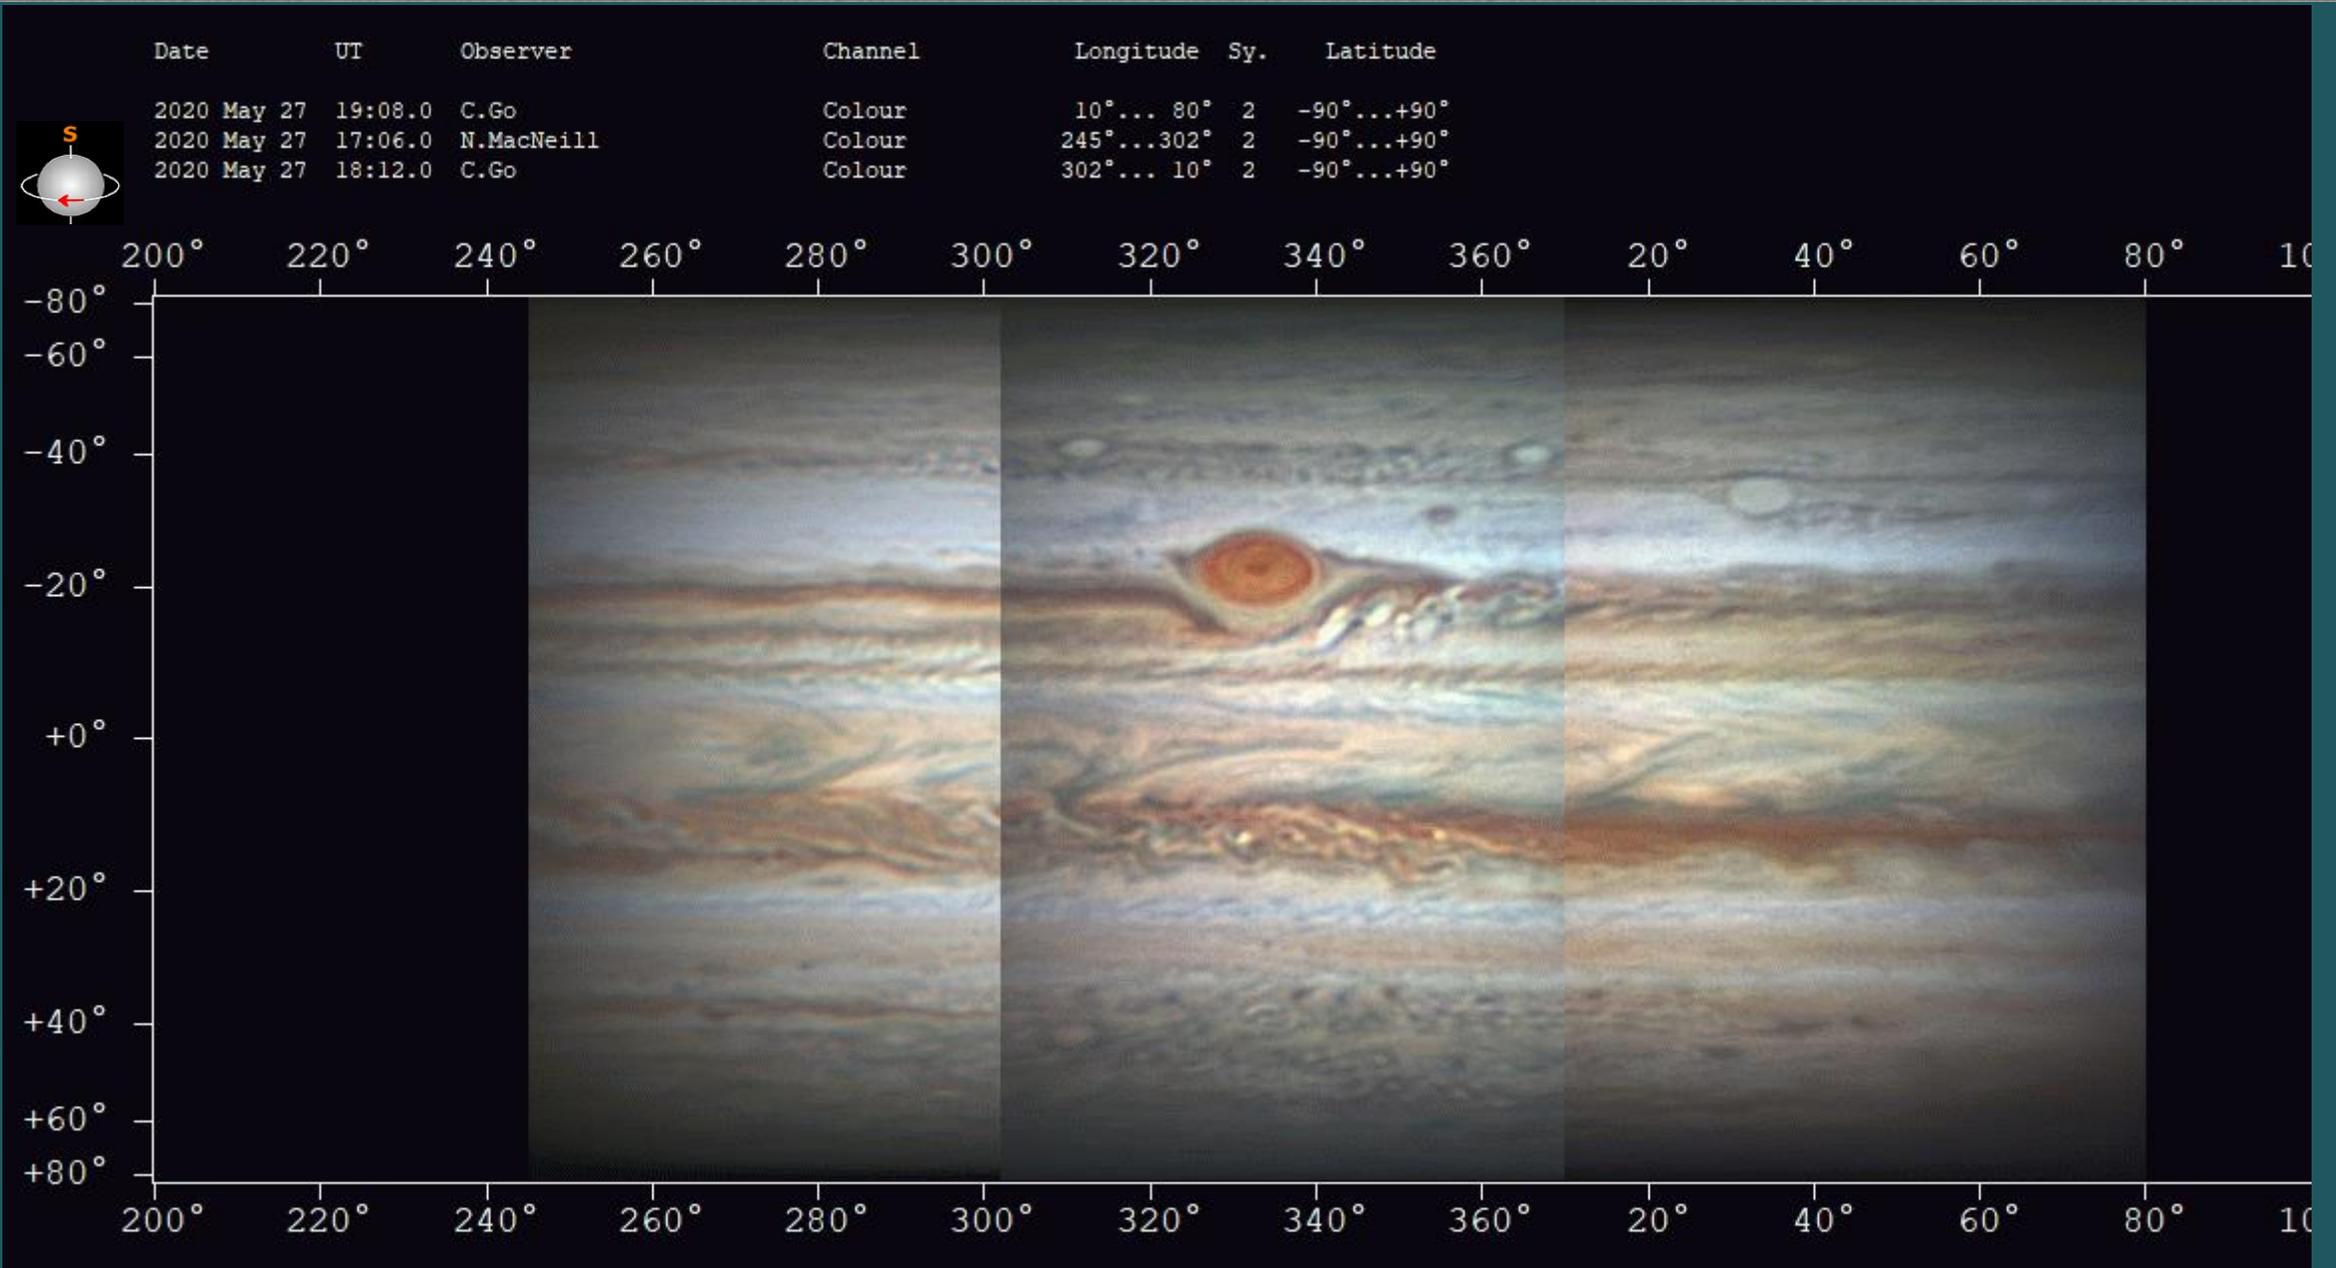

<Notes>

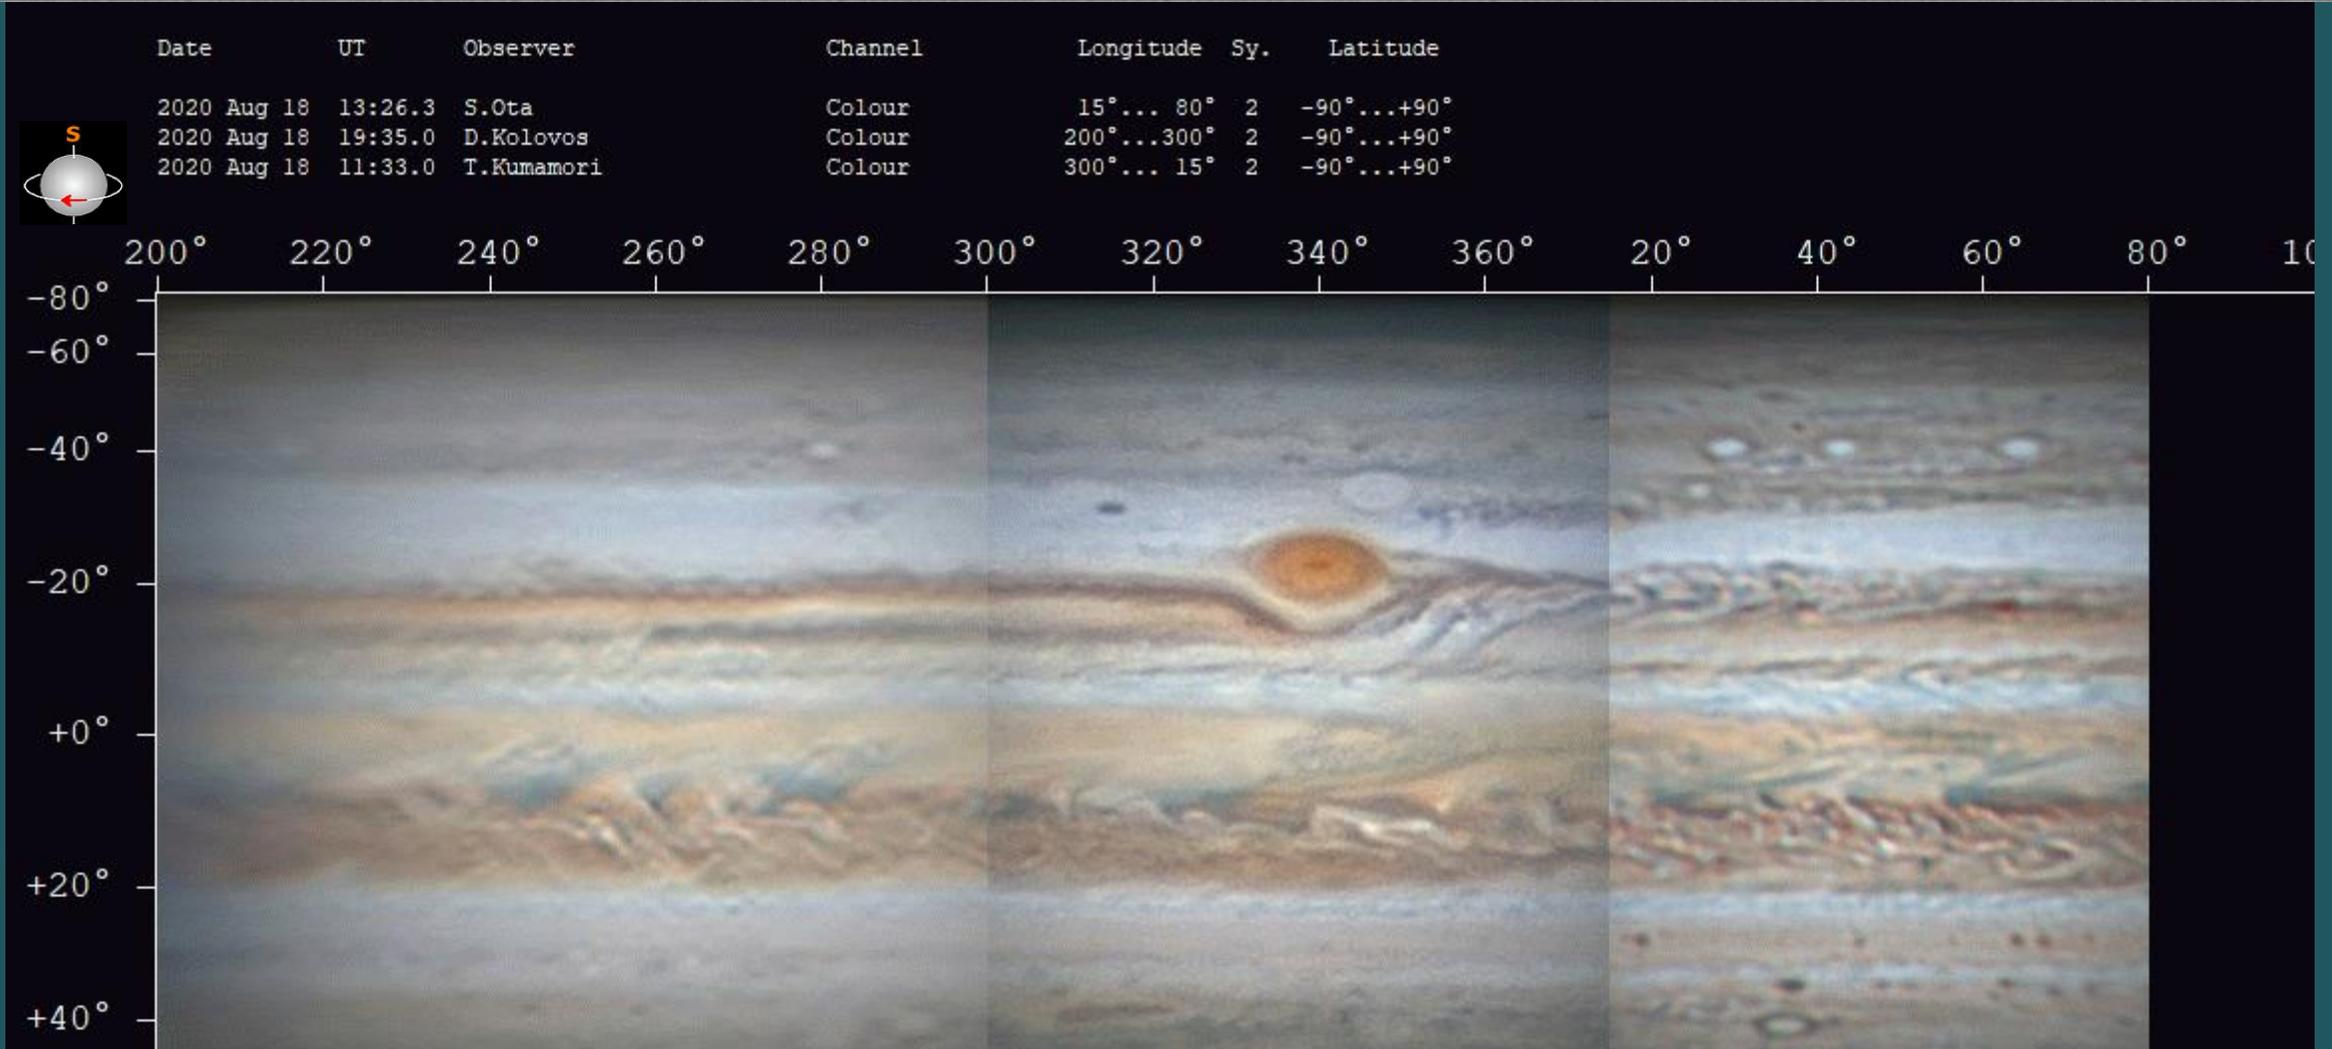

- GRS-Bay Rift opens.
 - ➡ Rift moves to the preceding side (east: left). At the same time, white clouds flow out from Rift.
 - ➡ Rift moves to the following side (west: right).
- When the GRS-Bay Rift closes, the SEBs (dark areas) on the preceding side will spread to the following side.

2. GRS-Bay Rift activities in 2020 (May 27-Aug 01 Animation) [Link-animation](#)

4

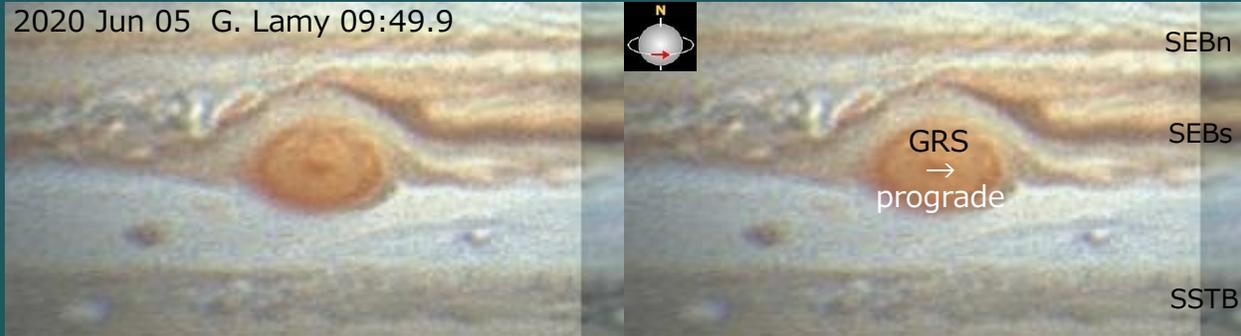

2. GRS-Bay Rift activities in 2020 (Aug 18-Nov 05 Animation) [Link-animation](#)

<Note>

- The appearance of white clouds flowing out from the open GRS-Bay Rift is remarkable.

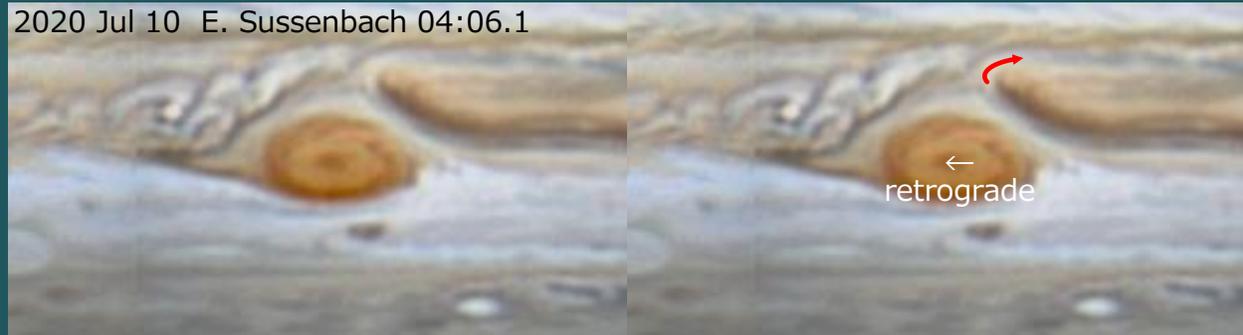

2. GRS-Bay Rift activities in 2020 (Jun 05-Jul 28 Maps) [Link-maps Ref. 3](#)

GRS-Bay Rift (Chimney) opens.

White cloud flows out.

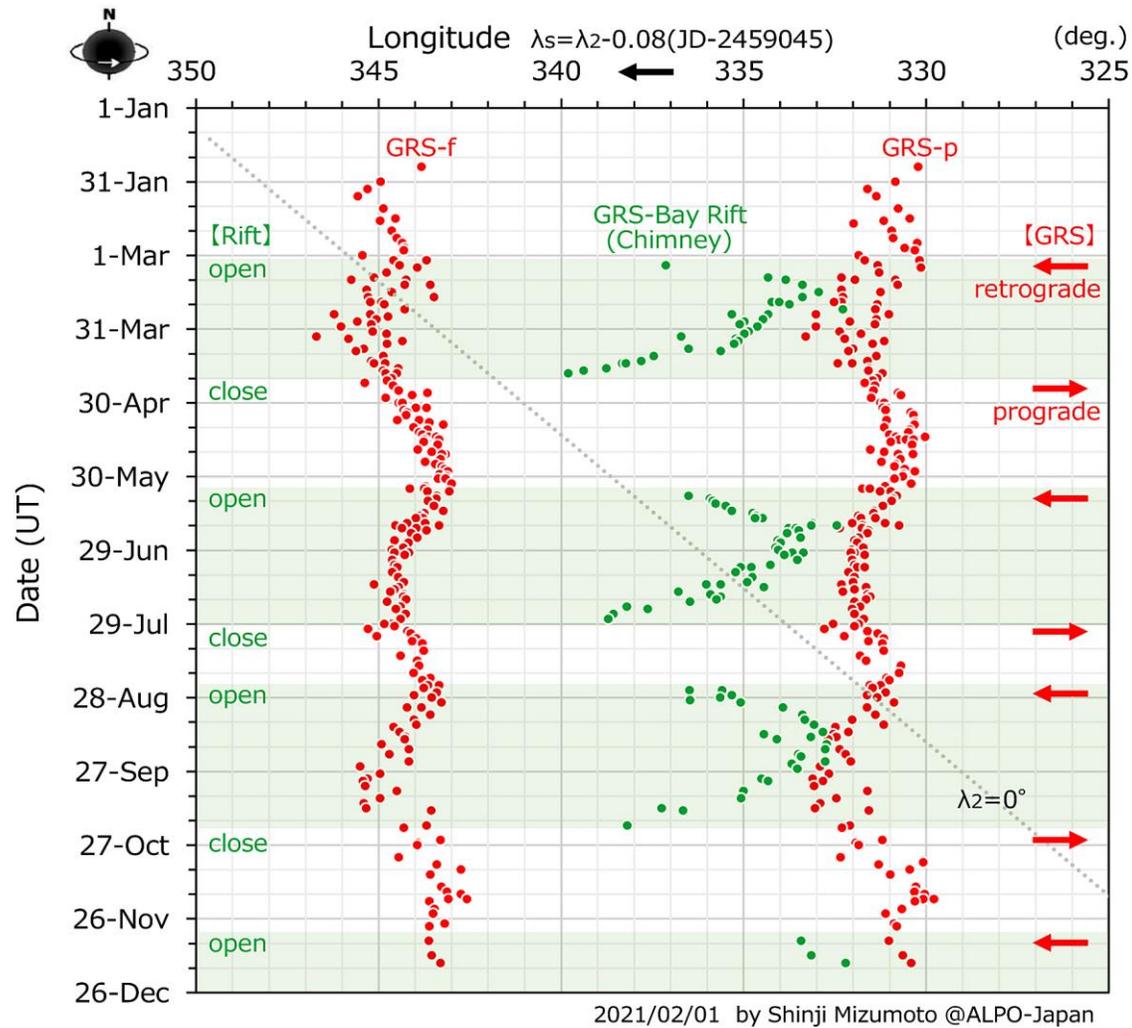

GRS-Bay Rift closes.

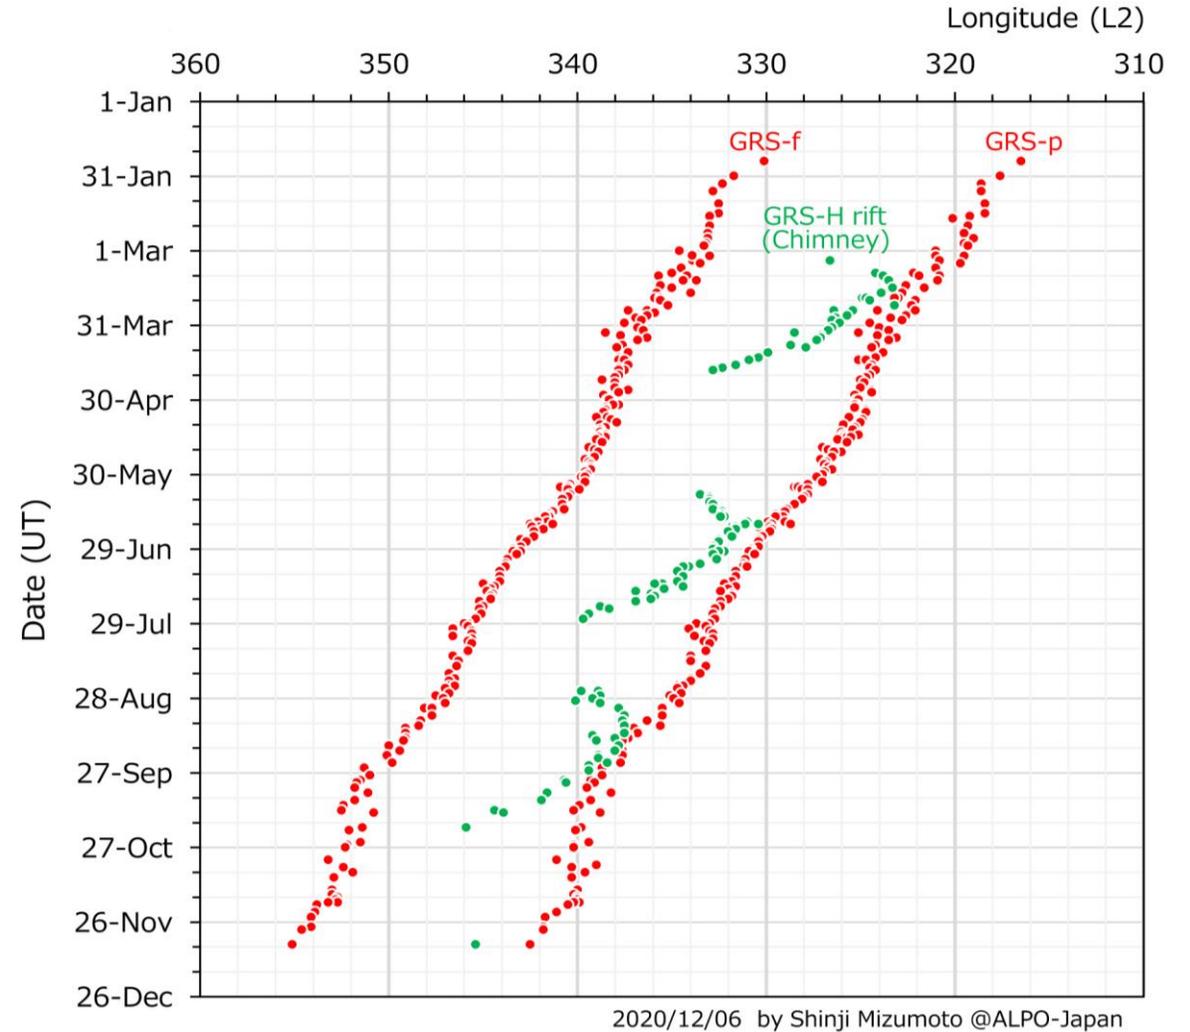

3. GRS-Bay Rift & GRS Drift Chart

<Special longitude - Drift Chart>

<L2 - Drift Chart>

- The opening and closing of GRS-Bay Rift is linked to the 3-month oscillation of GRS.

Relationship between Rift-related phenomena

GRS-Bay Rift (Chimney)	GRS 3-month Oscillation	GRS-Bay Length	GRS-Bay SEBs Slope
open	retrograde period	narrow, cramped	steep
close	prograde period	wide, spacious	gentle

As Kuniaki Horikawa pointed out

----- In the 3-month oscillation of GRS- -----

- The GRS-Bay Rift (Chimney) opens when the GRS longitude changes from decreasing to increasing (entering the retrograde period).
- The GRS-Bay Rift (Chimney) closes when the GRS longitude changes from increasing to decreasing (entering the prograde period).

verified the above.

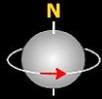

Acknowledgments

- I would like to thank the many observers for providing the observation data.
