Black letters are mainly descriptions of patterns.

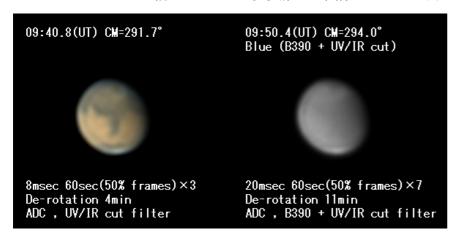

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

## 2021年3月18日

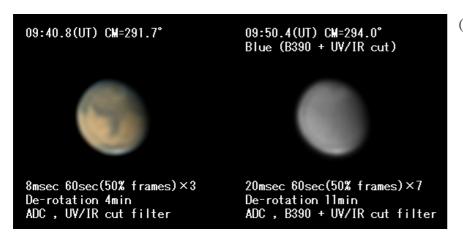

Syrtis の北西に北極の明るい部分が記録されているが、これはおそらく、NPC が記録されたものだと考えている。ただし、本当に NPC かの確証はない。筆者は良いシーイングで眼視観測をしたが、NPC が非常に細く見えていた。画像では肉眼のように細くならないが、幅はないといっていいくらい細いものである。伊藤の B 画像は Hellas の雲を見事に記録している。(下図)

## 2021, Mar. 18

The bright part of the Arctic is recorded northwest of Syrtis. I think this is probably an NPC recorded. However, there is no certainty that it is really an NPC. I made visual observations with good seeing, but the NPCs looked very thin. In the image, it does not become as thin as the naked eye, but it is so thin that it has no width. Ito's B image is a perfect recording of the Hellas clouds. (Figure below)
