

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

観測は、倍率 180 倍で行われました。安達は、観測の倍率を上げるときに、この倍率で見る時があります。しかし、小さすぎて、この観測と同じような状態にしか見えません。視直径が小さい時はもう少し倍率を上げるといいと思います。

(by 1 observation; reported by Makoto Adachi)

The observation was made at a magnification of 180x. Adachi sometimes sees at this magnification when increasing the magnification of observation. However, it is too small to look like this observation. When the apparent diameter is small, you should increase the magnification a little more.
