

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022 年 3 月 9 日

前日とほぼ同じ位置を記録している。気になった Meridiani (0W,-5)の北側の様子は影になっていてわからない。Xanthe (W53,+15)から Tharsis (80W~120W,+10)方面が黄色く観測され、ここしばらく続いているダスティーな様子を、横から見た姿になった。今日は、SPC は普通の大きさに記録されている。

2022, Mar. 09

It records almost the same position as the day before. The state of the north side of Meridiani (0W, -5) that I was interested in is in the shadow and I do not know. From Xanthe (W53, +15), the direction of Tharsis (80W ~ 120W, + 10) was observed in yellow, and it became a side view of the dusty appearance that has been going on for a while. Today, SPC is recorded in normal size.
