

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022 年 6 月 10 日 (2022, Jun. 10)

Mike Hood の画像は、火星の変化を記録している。Mare Cimmerium (W180~W250,-40~0)北端の Cyllenius L. (252W, 0)が見えないことだ、この付近に濃いダストがあるようだ。6 月 8 日に Antonio Cidadao が Eridania (200~230W,-35~-55)一帯を明るく記録していたが、Mike Hood の画像を見ると、再びこの一帯のダストが濃くなっているように見える。また、Ishidis (270W,+23)付近は西のリムに位置しているが、リムで明るく記録された。

Mike Hood's image records the changes in Mars. Mare Cimmerium (W180 ~ W250, -40 ~ 0) Cyllenius L. (252W, 0) at the northern end is invisible, there seems to be thick dust around here. Antonio Cidadao recorded the Eridania (200 ~ 230W, -35 ~ -55) area brightly on June 8th, but when you look at the image of Mike Hood, it seems that the dust in this area is thick again. .. Also, the area around Ishidis (270W, +23) is located on the west limb, but it was recorded brightly on the limb.
