

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

ダストストームの広がりをとらえた観測は報告されてこなかった。Ausonia (W235~270,-55~-20)から Eridania (200~230W,-35~-55)にかけては良く晴れており、地表の様子がよく見えるようになってきた。Vinicius Mansano Martins の画像では、Tithnius Lacus (80W~90W,-0)の西側が広くダストに覆われている様子を記録している。Eridania (200~230W,-35~-55)から Electris (165W~190,-40~-53)方面に、淡いダストのバンドがあるようだ。

Observations that captured the spread of dust storms have not been reported. It was fine from Ausonia (W235~270,-55~-20) to Eridania (200~230W,-35~-55), and the patterns on the ground surface became visible. Vinicius Mansano Martins' image shows that the western side of Tithnius Lacus (80W~90W,-0) is widely covered with dust. There seems to be a faint dust band from Eridania (200~230W,-35~-55) to Electris (165W~190,-40~-53).

(by 5 observations; reported by Makoto Adachi)
