南極フードは、明るいが大きく目立つほどではなかった。一方、NPC はやや黄色っぽくはっきりしている。極冠を取り巻く暗部は健在で、淡くなったところはほぼ見られない。Vincenzo della Vecchia も B 画像では、画像の右端にある Edom (360W,2)に白雲が記録されている。ターミネーター上なので朝霧かもしれない。

The SPH was bright but not large enough to be noticeable. NPCs, on the other hand, are slightly yellowish and clear. The dark areas surrounding the polar caps are still intact, and the faint areas are almost non-existent. Vincenzo della Vecchia also recorded a white cloud on his Edom (360W, 2) on the far right of the image in the B image. It may be morning fog because it is on the terminator.
