

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 4 月 19 日 (2023, Apr. 19)

一人だけの観測だった。前日とほぼ同じ経度での観測だが、Syrtis Major (293W,+0~20)の北半分が雲に覆われた様子を記録している。B画像を見ると、低緯度地方が帯状に明るく、赤道帯霧が記録されている。今シーズンは、この画像のような写り方をしたものが少ない。

It was a single observation. It was observed at almost the same longitude as the previous day, but the northern half of Syrtis Major (293W,+0~20) was covered with clouds. In the B image, the low latitude region is belt-like bright, and the equatorial fog is recorded. This season, there are few things that look like this image.

(by 1 observation; reported by Makoto Adachi)
