

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 4 月 15 日 (2025, Apr. 15)

日本は、4 月になったのに、寒気が入り込んでシーイングが悪くなり、観測は厳しかった。眞島の観測によれば、今まで Meridian (0W,-5)が見えにくかったが、雲が晴れてきて、少し見えやすくなってきたようだ。Clyde Foster は SPH をかなり淡く記録したが、他の観測地域では、はっきりとした姿での記録はなかった。この時期 SPH は見えても非常に淡いことが多い。

In Japan, even though it was April, cold air had entered and the seeing had become poor, making observations difficult. According to Majima's observations, Meridian (0W,-5) had been difficult to see until now, but the clouds had cleared and it seemed to be a little easier to see. Clyde Foster recorded SPH as quite faint, but no clear image was recorded in other observation areas. Even if SPH is visible at this time of year, it is often very faint.

(by 4 observations; reported by Makoto Adachi)
