Syrtis Major (293W,+0~20)の向きでの観測となった。NPC は明らかに見えるようになった。画像観測ではいずれも白い姿が記録された。高尾・阿久津は、Hellas (275~315W,-30~60)を記録した。Hellas は南半分だけ明るく、写り方を見ると霜のように見える。盆地全体には白雲が広がっている。また、Hellas から北側に白雲が広がっている様子も記録されている。

Observations were made in the direction of Syrtis Major (293W, +0~20). The NPC became clearly visible. All images recorded a white shape. Takao and Akutsu recorded Hellas (275~315W, -30~60). Only the southern half of Hellas was bright, and the way it was photographed made it look like frost. White clouds spread across the entire basin. It was also recorded that white clouds were spreading north from Hellas.

(by 4 observations; reported by Makoto Adachi)
