

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 7 月 16 日 (2025, Jul. 16)

Frank J Melillo の報告は火星像が小さいため、わかりづらいが、Chryse (35W,+10)や Xanthe (W53,+15)さらに Tharsis (80W~120W,+10)方面に相変わらず幅の広い白雲が記録されている。Ls は  $111^{\circ}$  で、だんだん見えなくなる時期が近付いている。Tempe (50W~90W,+45)付近や Argyre (30W,-50 )付近も淡い白雲がまだ見えるようだ。

Frank J Melillo's report is difficult to see because the image of Mars is small, but wide white clouds are still recorded in the areas of Chryse (35W, +10), Xanthe (53W, +15), and Tharsis (80W~120W, +10). The Ls is  $111^{\circ}$  , and the time when they will gradually become obscured is approaching. Faint white clouds are still visible near Tempe (50W~90W, +45) and Argyre (30W, -50).

(by 1 observation; reported by Makoto Adachi)
