

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 7 月 25 日 (2025, Jul. 25)

今日は、日本の伊藤からの報告だけになった。伊藤の画像には 7 月 24 日の観測で Nilokeras (50W,+30)付近の様子が含まれていた。ダストベールが広がっているのかと、気をもんだが、白雲が広がってはいるもののダストベールらしき姿はなく、一安心した。Tharsis (80W~120W,+10)の白雲は淡くなっているが今までとほぼ同じところに見えていて、この 2 日間以上があったようには見えなかった。

Today's report was only from Ito in Japan. Ito's images included images from observations on July 24th near Nilokeras (50W, +30). I was worried that a dust veil might be spreading, but although white clouds were spreading, there was no sign of a dust veil, so I was relieved. The white clouds over Tharsis (80W~120W, +10) had become fainter, but were visible in roughly the same place as before, and did not appear to have been there for more than two days.

(by 1 observation; reported by Makoto Adachi)
